Contents of Volume 18

Number 1, May 1976

. M. Gatehouse, T. Negas, and R. S. Roth. The Crystal Structure of M-$LiTa_3O_8$ and Its Relationship to the Mineral Wodginite 1

. Arnaud, M. Chevreton, A. Ahouandjinou, M. Danot, et J. Rouxel. Etude Structurale des Composés M_xTiSe_2 (M = Fe, Co, Ni) 9

chimin Shirotani and Nobuko Sakai. Physicochemical Properties of Alkali Metal Cation–TCNQ Anion Radical Salts 17

ay Kohn, Katsuhiko Inoue, Osamu Horie, and Syun-iti Akimoto. Crystal Chemistry of $MSeO_3$ and $MTeO_3$ (M = Mg, Mn, Co, Ni, Cu, and Zn) 27

ietrich Babel and Robert Haegele. Strukturen cäsiumhaltiger Fluoride, III. Die Kristallstrukturen der hexagonalen Elpasolithe: 12 L–Cs_2NaCrF_6, 12 L–Cs_2NaFeF_6, und 2 L–Cs_2LiGaF_6 39

. Kozłowski and J. Słoczyński. $CoTeMoO_6$, $Co_4TeMo_3O_{16}$: Two New Cobalt Molybdotellurates 51

. Aijaz Beg and Saifuddin Mumtaz Ansari. Kinetics and Mechanism of Reaction between Mercuric Bromoiodide and Silver Iodide in Solid State 57

oshihiko Sasa and Masayuki Uda. Structure of Stoichiometric USi_2 63

. Degraix, P. C. Gravelle, S. J. Teichner, et P. Turlier. Etude des Solutions Solides d'Oxyde de Lithium dans l'Oxyde de Nickel. I. Proprietes des Solutions Solides Preparées sous Pression Reduite d'Oxygene 69

. Degraix, P. C. Gravelle, et S. J. Teichner. Etude des Solutions Solides d'Oxyde de Lithium dans l'Oxyde de Nickel. II. Influence de la Pression d'Oxygene et Mecanismes d'Incorporation 79

Torkar und R. Schneider. Thermodynamische Untersuchungen im System NiO–CoO mittels galvanischer Festkörperketten 89

Number 2, June 1976

F. Marucco, R. Tetot, P. Gerdanian, et C. Picard. Etude Thermodynamique du Dioxyde de Niobium à Haute Temperature 97

H. Brixner and A. Ferretti. Eu^{+2} Fluorescence in $BaCl_2$ 111

D. Donaldson and J. Silver. Studies on Phases from the M:Sn(II):I:F Systems (M = Na, K, Rb, and NH_4) 117

ommy Ekström and R. J. D. Tilley. Structural Relations in the Nb–W–O and Ta–W–O Systems for the Phase Region near WO_3 123

PIERRE CONFLANT, JEAN-CLAUDE BOIVIN, ET DANIEL THOMAS. Le Diagramme des Phases Solides du Systeme Bi_2O_3–CaO 133

GEOFFREY J. DUDLEY, BRIAN C. H. STEELE, AND ARTHUR T. HOWE. Studies of Potassium Ferrite $K_{1+x}Fe_{11}O_{17}$. I. Electronic Conductivity and Defect Structure 141

ARTHUR T. HOWE AND GEOFFREY J. DUDLEY. Studies of Potassium Ferrite, $K_{1+x}Fe_{11}O_{17}$. II. Mössbauer Effect and Spin Flopping 149

G. ROSSE, DANG TRAN QUAN, ET J. PANNETIER. Proprietes Dielectriques des Composes des Systemes ZrF_4–Y_2O_3 et ZrF_4–Yb_2O_3 155

GÉRARD DEMAZEAU, MICHEL POUCHARD, ET PAUL HAGENMULLER. Sur Quelques Nouveaux Composés Oxygénés du Nickel + III de Structure K_2NiF_4 159

FUSAO TAKUSAGAWA AND ROBERT A. JACOBSON. Crystal Structure Studies of Tetragonal Sodium Tungsten Bronzes, Na_xWO_3. I. $Na_{0.48}WO_3$ 163

FRANÇOISE THÉVET, NGUYEN-HUY-DUNG, CHRISTIAN DAGRON ET JEAN FLAHAUT. Contribution à l'Étude du Système Formé par l'Étain, le Soufre et l'Iode. Mise en Évidence des Deux Variétés de l'Iodosulfure Stanneux Sn_2SI_2: Comportement Thermique et Étude Structurale 175

PHILIP M. CARKNER AND HELMUT M. HAENDLER. The Crystal Structure of Copper Bromide Telluride 183

J. C. A. BOEYENS, GLORIA J. MCDOUGAL, AND J. VAN R. SMIT. Crystallographic Study of the Ammonium/Potassium 12-Molybdophosphate Ion-Exchange System 191

NOTE

FRANCOISE EHRBURGER AND RUSTUM ROY. A New Method for Preparing Rare-Earth Monosulfides 201

ERRATUM 203

Number 3, July 1976

JOHN M. HASCHKE. Structural Correlations of the Lanthanide Halides and Related Compounds. Derivatives of the Anti-Nickel–Arsenide Structure 205

O. TOFT SØRENSEN. Thermodynamic Studies of the Phase Relationships of Nonstoichiometric Cerium Oxides at Higher Temperatures 217

ICHIMIN SHIROTANI, AKIFUMI ONODERA, YUSUKE KAMURA, HIROO INOKUCHI, AND NAOTO KAWAI. Electrical Conductivity of Hexaiodobenzene and Tetrahalo-*p*-benzoquinone under Very High Pressures 235

J. C. TAYLOR AND A. B. WAUGH. The Structures of Fluorides. XV. Neutron Diffraction–Kubic Harmonic Profile Analysis of the Body-Centered Cubic Phase of Sulfur Hexafluoride at 193°K 241

GERARD BACQUET, CLAUDE BOUYSSET, AND CLAUDE ESCRIBE. The Hydration Process of La_2O_3 Studied by the Electron Spin Resonance of Gd^{3+} and Mn^{2+} Ions 247

YU. D. TRETYAKOV, V. V. SOROKIN, A. R. KAUL, AND A. P. ERASTOVA. Phase Equilibria and Thermodynamics of Coexisting Phases in Rare-Earth Element–Iron–Oxygen Systems. I. The Cerium–Iron–Oxygen System 253

U. D. TRETYAKOV, V. V. SOROKIN, AND A. P. ERASTOVA. Phase Equilibria and Thermodynamics of Coexisting Phases in Rare-Earth Element–Iron–Oxygen Systems. II. The Praseodymium–Iron–Oxygen System 263

U. D. TRETYAKOV, V. V. SOROKIN, AND A. P. ERASTOVA. Phase Equilibria and Thermodynamics of Coexisting Phases in Rare-Earth Element–Iron–Oxygen Systems. III. The Europium–Iron–Oxygen System 271

IDEAKI INABA AND KEIJI NAITO. Heat Capacity Measurement of Cubic Lithium Tungsten Bronzes from 200 to 800°K 279

HULLIGER, M. LANDOLT, AND H. VETSCH. Rare-Earth Ferricyanides and Chromicyanides $Ln\mathrm{T(CN)_6}\cdot n\mathrm{H_2O}$ 283

. M. EL BALKHI, M. ZANNE, C. GLEITZER, ET A. COURTOIS Préparation et Propriétés d'un Oxyde de Sodium–Fer(II, III): $\mathrm{NaFe_2O_3}$ 293

. TAGUCHI, M. SHIMADA, F. KANAMARU, M. KOIZUMI, AND Y. TAKEDA. Magnetic Properties in the System $\mathrm{BaCo_{1-x}Mn_xO_3}$ and $\mathrm{SrCo_{1-x}Mn_xO_3}$ $(0 \leqq x \leqq 1)$ 299

G. SANKAR, S. K. MALIK, AND V. U. S. RAO. Crystal Field Effects on the Magnetocrystalline Anisotropy in $\mathrm{HoAl_2}$ 303

Number 4, August 1976

HULLIGER, M. LANDOLT, AND H. VETSCH. Rare-Earth Cobalticyanides $Ln\mathrm{Co(CN)_6}\cdot n\mathrm{H_2O}$ 307

TSUAKI NISHIDA AND YOSHIMASA TAKASHIMA. Kinetic Study of the Annealing of Fission Tracks in a $\mathrm{Fe_2O_3}$–$\mathrm{KPO_3}$ Glass Containing 100 ppm of Uranium 313

GUÉRIN AND M. SERGENT. Nouveau Phosphure Ternaire: $\mathrm{NiMoP_2}$, A Chaine Linéaire Infinie –Mo–Ni–Mo– et Composés Isotypes: $\mathrm{NiWP_2}$, $\mathrm{CoMoP_2}$ et $\mathrm{CoWP_2}$ 317

SCHOONMAN, E. E. HELLSTROM, AND R. A. HUGGINS. Electrical Properties of $\mathrm{K_2FeCl_5}\cdot\mathrm{H_2O}$ and $\mathrm{K_2AlF_5}$ 325

Author Index for Volume 18 397

Subject Index for Volume 18 will appear in the December 1976 issue as part of a cumulative index for the year 1976.

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, ectronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions e both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Contributions in Russian are ceptable, but they will be translated into English before publication. Manuscripts should be submitted to the ditor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of ajor sections should be typed in capital letters and centered on the page. Each page of the manuscript should be umbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For ultiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should nsist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *andbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding atters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, wer-case italic letters (^{a}, ^{b}, ^{c}). Tables longer than two manuscript pages should be submitted as clear, sharp ssy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page ter 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be posited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page is corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of ersize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the posited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The llowing footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to erence deposited material.

Supplementary material has been deposited as Document No. NAPS ..... with the National xiliary Publications Service, c/o Microfiche Publications, 440 Park Avenue South, New York, New York 006. A copy may be secured by citing the document number and by remitting $ for photocopy or $1.50 for crofiche. Advance payment is required. Make check or money order payable to Microfiche Publications.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be nned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible er a reduction of 50%. The caption of each axis should be lettered parallel to its axis. Background grids should be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. ch figure should be identified on the back with the author's name and the figure number. Figures are to be cited he text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten, with an Arabic number if necessary for erence placed in parentheses to the right of the equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate ge at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.

Treatise on Materials Science and Technology

Edited by

HERBERT HERMAN

Department of Materials Science
State University of New York a Stony Brook
Stony Brook, New York

FROM THE REVIEWS:

"The term 'treatise' implies a systematic presentation in depth. This is an apt description of the articles. They are thoughtful, fundamentally oriented, analytical, and become a bit abstract at times. Certainly they reflect the high standards of the editor and distinguished advisory board."

—WILLIAM B. HILLIG in Ceramic Abstracts

VOLUME 4

CONTENTS:

MICROSTRUCTURAL CHARACTERIZATION OF THIN FILMS
By Richard W. Vook

LATTICE DIFFUSION OF SUBSTITUTIONAL SOLUTES AND CORRELATION EFFECTS
By J. P. Stark

SOLID SOLUTION STRENGTHENING OF FACE-CENTERED CUBIC ALLOYS
By K. R. Evans

THERMODYNAMICS AND LATTICE DISORDER IN BINARY ORDERED INTERMETALLIC PHASES
By Y. Austin Chang

METAL POWDER PROCESSING
By Michael J. Koczak and Howard A. Kuhn

Author Index—Subject Index.

ANNOUNCING VOLUME 11 OF
METHODS OF EXPERIMENTAL PHYSICS
Editor-in-Chief: L. MARTON

Solid State Physics

Edited by ROBERT V. COLEMAN
Department of Physics
University of Virginia
Charlottesville, Virginia

CONTENTS:

W. A. REED, Experimental Methods of Measuring High Field Magneto-resistance in Metals

J. R. ANDERSON and D. R. STONE, Experimental Methods for the de Haas – van Alphen Effect

G. F. DERBENWICK, D. T. PIERCE, and W. E. SPICER, Experimental Techniques for Visible and Ultraviolet Photoemission

R. V. COLEMAN, R. C. MORRIS, and J. E. CHRISTOPHER, Experiments on Electron Tunneling in Solids

B. S. DEAVER, Jr. and D. A. VINCENT, Experiments Using Weakly-Linked Superconductors

R. L. COHEN and G. K. WERTHEIM, Experimental Methods in Mössbauer Spectroscopy

E. R. FULLER, Jr., A. F. GRANATO, J. HOLDER, and E. R. NAIMON, Ultrasonic Studies of the Properties of Solids

FRANK E. MOSS, The Use of Ions in the Study of Quantum Liquids

WALTER WEYHMANN, Thermometry at Ultra low Temperatures

JOHN M. PIERCE, Superconducting Microwave Resonators

C. D. GRAHAM, Jr., Superconducting Magnets

W. O. HAMILTON, Superconducting Shielding

D. C. LARSON, Experimental Methods in the Preparation and Measurement of Thin Films

D. J. CRAIK, The Observation of Magnetic Domains

Author Index–Subject Index.

1974, 800 pp., $48.00 / £23.05
